Victoria Harbour Photo Point Braemar Hill, North Point

An ideal location for taking photographs of Hong Kong's busy Victoria Harbour, including the Central Business District and Tsim Sha Tsui skylines can be found in the Braemar Hill Neighbourhood. The location is perched up on top of hill beside a government trigonometry (trig) station, with the view looking westward, providing ideal light for a range of times

Victoria Harbour looking west 5:00 pm

throughout the day. It's a quiet location surrounded by schools and country park, where, once you've taking care of the picture taking, you may want to relax and enjoy the stunning views of Asia's World Class City.

Neighbourhood

Breamar Hill neighbourhood is located in the North Point District, Hong Kong Island. It can be reached by a variety of public buses, which all travel/end at the Breamar Hill bus terminus. Three bus routes are suggested below, with each of the buses using the Octopus Card

Travellers Code of Ethics

**Move cautiously and quietly in natural areas.
Do not collect natural souvenirs.**

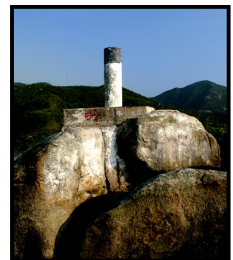

Depending on traffic conditions, travel time is indicated below.

Location	Bus Co./ Number Travel Time
Central - north of the IFC II Tower, near Outlying Ferry Pier	City Bus - 25C 40 minutes
Causeway Bay – Patterson Street, next to the 24h Welcome Grocery Store	Yellow Mini Bus 25M 15 minutes
Tin Hau MTR Station – above, in the bus station	Yellow Mini Bus 49M 15 minutes

Getting to the Photo Point Location

Refer to the map on the back and follow the trail to the trig station as indicated.

From the bus terminus, cross Braemar Hill road, walking easterly, to the steps leading down on the north end of Joan of Arc School. Follow the trail to the top of the stairs and at the top, turn right and walk along the dirt trail for about 100 meters. You will come to a junction of trails – proceed straight ahead for about 5 meters and off the right of the trail will be a small overgrown steep trail heading up the hill to the Trig Station. It's about a 25 meter walk up this trail to the Trig station which is mounted on a large "Tor" (rock) as pictured above.

Trig Station
